

PRODUCTIVE EMPLOYEE EXPERIENCES WITH INDOOR INTELLIGENCE

The InnerSpace Employee Experience mobile app is designed to put information about your office space in the hands of your employees. Designed to enhance your team's day and improve decision-making and productivity, the InnerSpace Employee Experience app delivers valuable information to any smartphone.

The average employee wastes 30 minutes every day looking for meeting rooms!

Employee Benefits

- + **Finding the Right Workspace:** Discover areas in the office available for different work needs. Find a flexible work space, meeting room, or collaboration area to suit your needs that day. Conveniently book meeting rooms within the app.
- + **Planning Ahead:** Make informed choices about visiting services like the Cafe to be your most productive without waiting in line, or worse, skipping lunch.
- + **Discover Resources:** The closest printer, first aid kit, or washroom is at your fingertips. An ideal feature for new employees.
- + **Remote & Flex Working:** It's never been easier to pick the best day/time to visit the office to ensure space is available for you and your clients.
- + **Build Your Team:** Receive permission-based alerts when colleagues are in the vicinity whom you want to connect with, welcome new employees, and find the people you need quickly.

Operational Benefits

- + **Improve Productivity:** The app is designed to help eliminate wasted time - such as time spent finding meeting rooms and wasted time waiting for resources or at the Cafe.
- + **Optimize Office Design:** Measure utilization of workspaces to determine how many people use meeting rooms, hotdesking areas, and assigned seating and reallocate as desired.
- + **Measure Engagement:** Clearly see how when and often people come to the office across your demographics to support planning, resourcing and putting data into the hands of your managers.

Configured to Your Office

The mobile app is configured to surface your most important data. Based on your floor plans and office design, the InnerSpace app highlights bookable spaces, popular resources, common areas, and even your Cafe menu.

Designed with Privacy in Mind

The InnerSpace mobile app uses the InnerSpace indoor location platform which calculates the location of smart devices including smartphones, laptops and smart watches. Personally identifiable information is not captured or stored, and the platform is compliant with the GDPR best practices for managing data privacy. Individuals opt-in at their own discretion to share presence with their colleagues. For more information on our sensors, click [here](#).

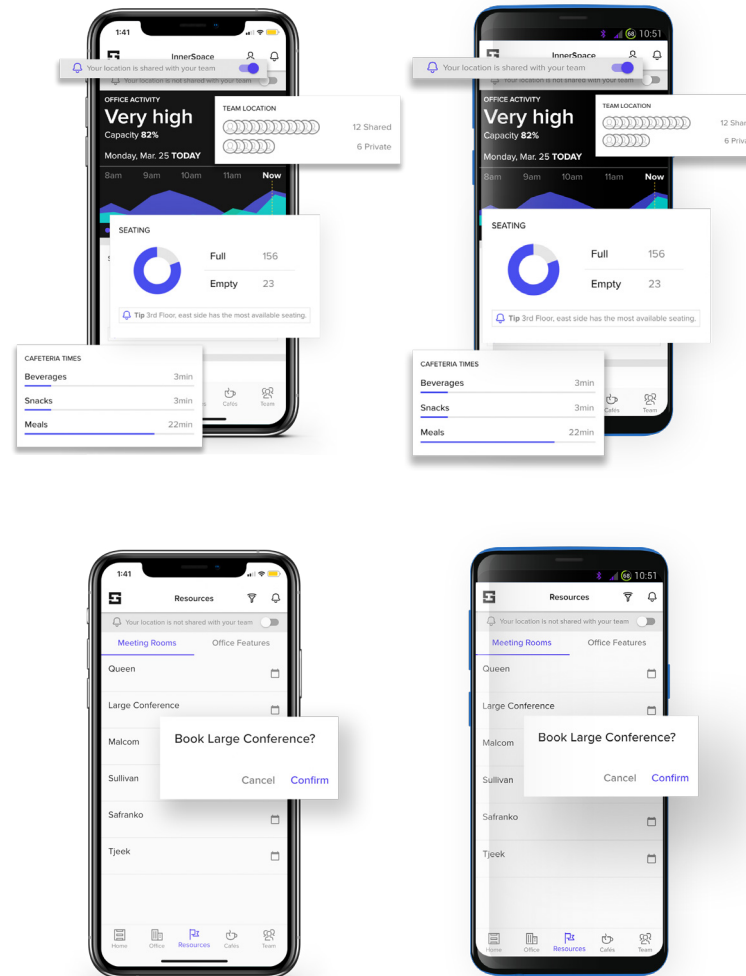

Platforms

The InnerSpace Employee Experience mobile app is available on:

- + iOS (iOS10+)
- + Android (JellyBean+)

Features

The InnerSpace app uses indoor location data to surface insights to help your employees make informed choices throughout their day.
